1. Introduction: What is BizarreBeasts?

BizarreBeasts is an entire creative universe built from original, hand-illustrated artwork. The same art and drawings I've been creating in the studio since 2018, now evolved into ownable, collectible media powered by decentralized technology.

It's a world of darkly humorous, strangely personlike characters that started as canvas paintings and ink illustrations. Over time, those drawings became NFTs. The NFTs attracted collectors. The collectors became a community. The community fueled a token. And the token unlocked games, rewards, and an ecosystem: a living, breathing creative economy powered by people who appreciate the BIZARRE.

At its core, BizarreBeasts operates on three principles:

Community

Everything we build is for the people who show up and want to participate in building something BIZARRE and lasting.

Coins

The $BB token is the fuel for our creative economy. It captures the value of the culture we build and rewards those who contribute to the ecosystem's growth.

Culture

Original art. Original games. Original stories. No templates. No AI slop. Every pixel, every brushstroke, every line of code, made by hand.

I'm building a notorious onchain art-powered, community-driven project to create a full universe of BizarreBeasts: web3 games, collectibles, merch, and coming in 2026, streaming animation on DCP+.
